

XanEdu Technology Showcase

What happens when you combine the service and convenience of XanEdu with the range and versatility of Web 2.0?

Web 2.0 is an exciting, dynamic place where your students spend a lot of time interacting, watching, responding, and communicating. Have you been searching for a way to harness the dynamic nature of Web 2.0 within your course work?

Now you can with XanEdu Technology Showcase, the easy way to incorporate the power of Web 2.0 functionality into your Digital CoursePack.

“Widgets are an ideal medium for creating interactive, individualized instructional materials...”

— Inside Higher Ed

The web today contains a large number of tools—often called “widgets” – that allow the non-technical to add an array of new features and functionality to their web applications. And now with XanEdu Technology Showcase, adding the interactivity of Web 2.0 to your Digital CoursePack is quick and easy.

XanEdu Technology Showcase allows you to choose one of these versatile widgets to embed in your Digital CoursePack, so your students can engage in a more rich experience that incorporates the latest web functionality they have come to expect.

Selected specifically for their ability to enhance your students’ learning experience, the XanEdu Technology Showcase widgets include:

-  **YouTube.** Embeds user-generated videos from YouTube in your Digital Coursepack. For instance, if your staff recorded a guest lecture and uploaded it to YouTube, it can be easily included in your CoursePack using this widget.
-  **Discussion Board.** Allows students, from directly within the Digital CoursePack, to share comments and queries with the rest of the class.
-  **VizuPoll.** Embeds your custom-written poll question in the Digital CoursePack. For instance, you can craft a poll question that gauges student satisfaction with the content in the CoursePack itself.
-  **SlideShare.** Embeds PowerPoint presentations in the Digital CoursePack.

And whether you “do it yourself,” or rely upon your XanEdu account team to assemble your CoursePack, it makes no difference –embedding one of these XanEdu Technology Showcase widgets is as simple as instructing your Account Service Manager to do so.

Combine the service and convenience of XanEdu with the range and versatility of Web 2.0 and what do you get? XanEdu Technology Showcase – and satisfied students!
